FROM THE NEW MONTREY MAGAZINE. "SHE NEVER TOLD HER LOVE." SHAKSPEARE.

OH! it is sweet to hush the sigh That trembles on the lip of beauty! To wipe the dew that wets the eye Of her who pines 'tween love and duty!

Oh ! it is seet to soothe the breast That throbbing swells with tender feeling!
To view the cheek in dimples drest, Where languid sorrow's tears were stealing!

Too oft in heauty's gayest hour, The heart within is cold and gloomy; Too oft the smile is like the flow'r\* That lives not-feels not-yet is gloomy.

Ah! hapless woman may not tell, She loves—tho' love each glance revealing Her heart may beat—her bosom swell— Her only hope is in concealing. And 'mid the weight of inward care,

Her eye with crystal light is beaming, The smile still seems to linger there, But sorrow's flood within is streaming.

So may be seen at eve's last hour, When calm and bright the moon is shining, The lily's spotless virgin flow'r, In tears its tender head reclining.

FOR THE TOMB ERECTED TO THE MEMORY OF THE MARQUIS OF ANGLESEA'S LEG. Here rests, and let no saucy knave

Presume to sneer or laugh— To learn, that, mould'ring, in this grave Is laid-a British CALF

For he who writes these lines, is sure, That those who read the whole, Will find such laugh were premature, For here, too, lies—a SOLE.

And here five little ones repose Twin-born with other five, Unheeded by their brother toes, Who all are now alive.

A leg and foot, to speak more plain, Rest here, of one commanding, Who, though his wits he might retain, Lost nade his understanding.

Who, when the guns, with murder fraught, Pour'd bullets thick as hal, Could only in this way be brought To give the fee LEG-BAIL.

Who now, in England, just as gay, As in the battle brave, Goes to the rout, review, or play With one FOOT IN THE GRAVE.

Fortune in vain here show'd her spite, For he will still be found, Should England's sons engage in fight, Resolv'd to stand his ground

But fortune's pardon I must beg,
She wish'd not to disarin;
And when she lopp'd the hero's leg, She did not seek his g-ARM!

And but indulged in harmless whim— Since he could walk with one, She saw two legs were lost on him, Who NEVER DEIGN'D TO RUN.

The following is the process: As soon as the milk has been taken from the cow, it must be placed in an earthen or tin vessel, and allowed to stand 12 hours. It must be then placed on a steady wood fire, free as possible from smoke, and scalded for 30 minutes-particular care must be taken not to allow it to boil. It must then be placed in a cool situation, and on the following day a thick rich cream wil appear on the surface of the milk (which is excellent also for desert purpose)this may be taken and made into butter

#### FROM THE BALTIMORE PATRIOT. RESPECT FOR THE LAWS.

The people of the United States, more than those of any other nation, are celebrated for their cheerful obedience to those salutary regulations of government which constitute its safety, and administer to their own happiness. No other ation on the globe, so exposed to the innovating and dangerous influence of foreigners, preserves, so little impaired. its primitive regard for law, morality and coligion, as the United States.

On this subject, we often meet with paragraphs in foreign papers highly hoorable to the fidelity and zeal of our itizens. A late London paper remarks : All the travellers whom we have ever read, express their astonishment at the respect which every American manifests for the laws of his country. FROM THE NEW-YORK COLUMBIAN. In our paper of Saturday we noticed the speculations of the London prints, relative to the policy by which the American government were influenced. The speculations alluded to seem to have grown out of the act of congress to increase our naval establishment; or rather out of the prompt manner in which that act was carried into effect. But had these transatlantic writers known, that efforts were making by the government to increase our means of internal defence, their jealousies and suspicions would probably have been strengthened and confirmed On this subject it may be remarked, that some of the United States' regiments have been employed during the last summer in cutting military roads. That topographical engineers are busily engaged in surveying and making notes and maps of our coasts. That several distinguished officers of the army and navy have re cently been appointed by the President, for the same purposes.
